Original URL	Defanged Representation
http://malicious-login-portal.com/verify?token=992	hxxp://malicious-login-portal[.]com/verify?token=9

Attachment Forensic Analysis:

No attachments detected.

Strategic Recommendations & Remediation Playbook

Recommended Incident Response Steps:
1. **Isolate Endpoint:** If any user interacted with or executed attachments from this email, isolate the device immediately.
2. **Revoke Sessions:** Force a reset of user credentials and active token sessions if credentials were submitted.
3. **Email Gateway Block:** Add extracted sender domains and IOC file hashes to your secure email gateway (SEG) blocklist.
4. **Tenant Purge:** Run automated message purge commands across Exchange Online or M365 to remove copies from user mailboxes.
